PROJECTS

Learning Progress Tracker	Project link
<ul style="list-style-type: none">The Learning Progress Tracker is a Java-based console application designed to manage and monitor students' progress in an educational setting. The application allows administrators or instructors to perform various tasks related to student management, including adding students, tracking their progress across different courses, and generating statistical reports.	
Budget Manager	Project link
<ul style="list-style-type: none">The Personal Finance Tracker is a Java-based console application designed to help users manage their finances by tracking income, expenses, and providing insightful analysis of their spending habits. The application offers a straightforward interface to perform various financial operations, such as adding income, recording purchases, viewing a list of all transactions, and analyzing spending patterns.	
Flashcards	Project link
<ul style="list-style-type: none">This Flashcard Management System is designed to help users create, manage, and review flashcards efficiently. The project provides users to add new flashcards, remove existing ones, import and export flashcard data from/to a file, and track their learning progress by identifying the cards they find most challenging.
